ISI-ZVAC Milling Dust Collector with Auto On/Off Function

Features & Benefits

Manufactured in the U.S.A., the Z Vacuum Milling Dust Collector is engineered for the safe and effective removal of particulates from dental milling processes. An external port allows connection to a dental milling machine for automated operation.

Equipped with a high efficiency submicron filter the unit can also be used to capture dust from zirconium and aluminum oxides, heavy duty stone, metal, plaster, and porcelain grinding. Includes one 6 ft. 3.5mm three contact audio cable, one spare filter and a vacuum hose adapter 2-1/2" to 36mm.

- ▶ Eternity Motors = no brush changes
- ▶ High Efficiency Submicron Closed Bag Filters
- ▶ Powerful, Compact and Quiet

Specifications

Frequency	60 Hz	Noise	64 dB
Voltage	120V	Weight	31 lbs
Current	7.8 Amps	Dimensions	13"x11.75"x13.5" (34cm x 30cm x 35cm)
Power	1.25 hp	Vacuum Port	Fits 2.5" Standard Vacuum Hose End
Vacuum	88 in-H2O (21kPa)	Auto-Port	3.5 mm three contact audio jack 24 V DC Signal Voltage 22 mA minimum signal current
Air Flow	104 cfm (2.9m ³ /min)		
Filter Efficiency	97% @ 0.3-0.5um		

Replacement Parts
High Efficiency Submicron Closed Bag Filters - \$54

Accessories
Flexible Vacuum Hose (6ft. x 2 1/2") - \$35
